DeepSeek AI: History

DeepSeek AI is a Chinese artificial intelligence company that has rapidly emerged as a significant player in the global AI landscape. Founded by Liang Wenfeng and backed by the Chinese quantitative hedge fund High-Flyer, DeepSeek focuses on developing large language models and AI technologies. The company has gained international attention for its cost-effective approach to building powerful AI systems, challenging the prevailing narrative that cutting-edge AI development requires massive financial investment.

Year	Event
2023	Founded
